In 1996, Medstrat designed the industry’s first PACS specifically geared to meet the unique needs of orthopedic surgeons and their practices. Through the use of the Joints™ family of products, Medstrat enables surgeons to streamline their clinical and OR operations, reduce costs and work more efficiently than ever before. With over 10,000 orthopedic users, 750 million images under management and a 97% customer retention rate over the last five years, Medstrat is the clear leader in orthopedic PACS and collaborative digital templating. With our PACS Conversion Program, Medstrat can migrate your practice to JointsPACS™ with minimal up-front investment.
